Education

JSS Academy of Technical Education

Bachelor of Technology in Computer Science

2020 – 2024

Noida, Uttar Pradesh

SR DAV Public School

12th Grade Science

2018 – 2020

Dayanand Vihar, Delhi

Professional Summary

Software Developer with 1.1 years of experience in cloud-native application development and automation. Proficient in **Python, Go, and React**, with a strong foundation in **data structures and algorithms (700+ problems solved)**. Experienced in building **scalable APIs** and **cloud-agnostic systems** across **AWS and GCP** environments.

Experience

SecLogic

August 2024 – September 2025

Associate Software Engineer (Backend and Cloud Systems)

Noida, Uttar Pradesh

- Designed and developed a **Python**-based backend service using **Flask** to orchestrate container image vulnerability and secret scans, integrating with **Docker**, **ECR**, and internal artifact registries.
- Provisioned and automated cloud infrastructure using **Terraform**, enabling scalable deployment workflows with startup scripts that executed scanning pipelines and persisted results to secure cloud storage.
- Refactored the system into a **cloud-agnostic architecture** supporting both **AWS** and **GCP**, consolidating multiple repositories and reducing long-term maintenance overhead by **40%**.
- Extended an open-source **Kubernetes** vulnerability scanning tool written in **Go** to extract container image layer metadata and detect embedded secrets, improving audit depth and accuracy.
- Built a **Kubernetes API**-driven Python service to aggregate pod logs across dynamic namespaces with configurable time windows, enabling centralized observability across multi-cloud clusters.
- Automated log and artifact ingestion into **S3** and **GCS**, supporting centralized monitoring pipelines and improving operational visibility across environments.
- Developed and optimized **GitLab CI/CD pipelines** for dependency automation and binary packaging, reducing deployment time by **30%** and enabling multi-project reuse across branches.

Projects

Personal Portfolio Website | *React.js, HTML5, CSS3, JavaScript*

July 2025

- Developed and deployed a fully responsive portfolio site using **React.js**, showcasing **6+ projects**, experience timeline, and skills with engaging animations.
- Integrated SEO, social links, and a contact form, resulting in **40% faster load time** and improved discoverability on search engines. [Live Demo]

Social Blog Website | *HTML, CSS, Bootstrap, Flask, SQLite*

July 2024

- Built a responsive **front-end** using **HTML**, **CSS**, and **Bootstrap**, boosting user engagement by **25%** across devices.
- Engineered a **full-stack** solution with **Flask** and **SQLite**, optimizing **database queries** for **95%** data consistency.

Technical Skills

Languages: Python, C++, C, JavaScript, SQL, HTML, CSS, Terraform, YAML, Golang

Cloud & DevOps: Google Cloud Platform (GCP), Amazon Web Services (AWS), Microsoft Azure, Docker, Kubernetes

Technologies/Frameworks: React.js, Flask, Bootstrap, Streamlit, IAM, Event-Driven Architecture, Microservices

Databases: MySQL, MongoDB, SQLite, PostgreSQL, Pinecone, ChromaDB

Tools: VS Code, Git, Terraform, Linux, Shell Scripting, Langchain, ClamAV, Pub/Sub, SQS, Lambda

Honors and Certificates

- Solved more than **700+** questions on LeetCode and GeeksForGeeks combined.
- Completed iNeuron Certified Foundational Generative AI course.
- Completed Goldman Sachs Certified FinTech Engineering Virtual Experience (Forage).
- Completed Udemy Certified Python and Flask Bootcamp: Create Websites using Flask.
